SUMMARY

Results-driven Backend Developer with 1.5+ years of experience in specializing in PHP and CodeIgniter. Seeking a challenging role where I can leverage my skills to contribute to organizational growth. Looking forward to adapting to new environments, continuously learning, and collaborating effectively with team members.

WORK EXPERIENCE

PHP Developer | SoftPulse Infotech

Sep 2024 – Present

- Improved existing applications by **fixing reported issues** and implementing **new features**.
- Developed a **Shopify-based app** related to return order management delivering a **production-ready, scalable system**:
 - Independently handled the **entire backend** of the application.
 - Designed and implemented **secure REST APIs** to support frontend workflows.
 - Architected and managed the **MySQL database schemas and queries**.
 - Built **admin workflows** enabling end-to-end return management and operational visibility.
 - Integrated multiple **third-party logistics services**, for return pickups and tracking.
 - Implemented **Shopify GraphQL** for dynamic store data and stay updated with Shopify updates
 - Created and managed **Shopify webhooks** for order/return event handling
 - Implemented **Shopify App Proxy** to allow customers to create returns securely from the storefront
 - Focused on **backend scalability, performance optimization, and secure API handling**

Web Developer Intern | SoftPulse Infotech

Feb 2024 – Aug 2024

- Built a strong foundation in **HTML, CSS, JavaScript, jQuery, PHP, CodeIgniter, and Shopify**.
- Completed a series of **project simulations and dummy tasks** under the guidance of senior developers
- Acquired foundational understanding of **backend structure and API development** for **Shopify-based systems**
